SECOND STATE CDE PROGRAMME

MAR 09
2025
9:30 AM - 3:30 PM

Program Overview

The programme aims at latest and innovative technologies and materials in minimally invasive dental practice which enable the clinicians to upgrade his day to day practice with better results and revenue. Participants will learn about tools and products that address current symptoms and prevent future issues. The program focuses on enhancing assessment skills, showing that prevention can be profitable and simple. Attendees will gain insights into how straightforward procedures can boost revenue and contribute to their practice's success and patient satisfaction.
